DETAILED ACTION

Claim Rejections - 35 U.S.C. § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 22-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Morrison et al.

Morrison et al discloses a guidewire having a core of carbon steels as well as titanium (Col. 2, lns. 5-10), and a coil of two connected sections (13,16) of stainless steel (Col. 2, lns. 6), having a circular-cross section and extending the entire length of the guidewire (Fig. 1, Col. 2, lns. 64-68), and at (19) a brazing compound to secure the coils to the core.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1. Mar et al. (4,721,117) discloses a guidewire having a coil over a substantial portion of the core.
2. Sauter (5,891,055) discloses a guidewire having multiple coils over the length of the device and the distal portion of the coil embedded within the distal tip.
3. McMahon (6,106,485) discloses a guidewire with a coil covering the distal most portion of the core.

Art Unit: 3736

4. Engelson (5,984,878) discloses a guidewire having a coil over the distal tip and a coating over the length of device.
